

Title: Hidden Markov Models for Cryptocurrency Trading

Language: English

Submission deadline: September 2022

Table of Contents:

1. Introduction into cryptocurrency market
2. Theoretical aspects of Markov processes and models, Hidden Markov models
3. Parameter Estimation for Hidden Markov Models, theory behind EM algorithm
4. Observable states on cryptocurrency market, system architecture of the trading algorithm
5. Trading algorithm construction and evaluation on time-series data, comparison with other machine learning models
